Don’t Operate Without a Chute

If you keep a herd of 50 head or less, you might not think a squeeze chute is for you. Yes, you can work cattle with a headgate, or the help of a few loyal friends who rope. But there are lots of reasons why use of a squeeze chute should be on the top of your list. Your safety is at the top of that list. Herd health, and the related economic benefit it creates, is also an important payoff.

For example, Researchers at the University of Kentucky developed enterprise budgets for 50-cow herds with a $5,000 investment in handling facilities that included a headgate and chute. The resulting increases in calving percentages and weaning weights, as well as lower death loss rates for both cows and calves, proved that the investment paid for itself in less than five years.

Choosing the Right Chute

Before buying a squeeze chute, you need to answer a few questions about its intended use. Bovines come in all sizes, weights and attitudes, so a chute that works for one producer may not work for another.

Some squeeze chutes apply squeeze pressure from only one side, while others squeeze from both sides, forming a ‘V’ shape that helps balance and support the animal. Regardless of design, experts agree that the best squeeze chutes allow both sides to squeeze equally, thus keeping the animal balanced. The Canada Plan Service gives the following guidelines for the inside widths of the chute at the bottom of the V shape:

• Six inches for 250-to 400-pound calves.
• Eight inches for 600-to 800-pound animals.
• Twelve inches for cows and heavy feeders.
• Fourteen to sixteen inches for larger bulls.

Animal scientists with the Alabama Cooperative Extension service list four basic types of headgates: self-catching, scissors-stanchion, positive-control, and full-opening stanchion. Once again, you need to know what kind of animal you’ll run through the chute. For example, self-catching gates don’t work well with horned cattle. There are lots of options available:

• A door or space that allows injections to be given in an animal’s neck is a necessity in order to avoid damaging expensive cuts of meat.
• A service door or palpation cage provides access to the rear of animals.
• Hydraulic squeeze chutes take some of the effort out of operation.
Big Valley™
HHD
Hydraulic Squeeze Chute

Standard Features
• Heavy Duty Hydraulic Headgate, Tailgate & Squeeze for maximum flexibility
• 8' long to handle calves to the largest bulls
• Direct cylinder on headgate & tailgate for quick response and less bruising
• 5-hp single phase removable power unit for optimum power in all conditions
• All pivots have bronze bushings for smooth action and greater durability
• ¼" floor plating
• Headgate and tailgate bushings 3½"
• 12 gauge sheeting
• Frame tube 2½" sq. x 3/16"
• Detachable Neck Extensions
• See pages 10 for scale accessories

Optional Features
• Rumbar Floor
• Side Exit
• Hydraulic Neck Sweep
• Palpation Door

Other models and options including side exits, are available. Call 800-447-2751 for quotes.
Big Valley™
HMD
Hydraulic Squeeze Chute

Standard Features
• Dual voltage motor, pre-wired for 115V with plug, capable of 230V
• Full 8’ long chute
• Hydraulic headgate, tailgate, squeeze, & optional live floor
• Bronze bushings on every joint
• Compatible with M1V chute trailer for use anywhere
• Heavy Big Valley M1V drop bars and latches are standard
• Fully assembled from the factory, ready to use
• 1500 lb capacity

Optional Features
• Rumbar Floor
• Side Exit
• Hydraulic Neck Sweep
• Palpation Door

Other models and options including side exits, are available. Call 800-447-2751 for quotes.

The most innovative and technologically advanced chute in the cattle industry

A patented noise reduction system of 130 contact points sheathed in oil based polyethylene to significantly reduce the noise level.

Full-opening head and tail door

The headgate is wrapped in rubber to prevent shoulder damage to the animal.

Hydraulic head restraint (becomes half of the neck bars when used that way)

Rubber louvers prevent animals from seeing humans to the side of chute.

Dual additional neck access for precision vaccinating.

Choice of power units.

For animals from 350 lbs. on up.

Premium powder coat paint - Green

See page 10 for scale accessories

In addition to the standard features, the main frame has 4" x 2" x 3/16" rectangular tubing, ¼" wall side-gates, ¼" floor for increased life of chute, modular construction for superior maintenance, replaceable heavy-duty drop bars, 10 quick change relube roller bearings - top connector and lower head door connector and 6 - 4 x 2 cylinders.

Deluxe Ranch & Heavy Duty Extended Chutes

Silencer Extended model chutes are designed with a rear door for the operator to step in behind the animal for artificial insemination, semen checking, preg checking, embryo transfer, etc.

Other models and options, are available. Call 800-447-2751 for quotes.
Big Valley™
M1-V
Squeeze Chute

• A user-friendly, heavy-duty chute designed for animal and operator safety.
• Best value in its class.
• Capable of handling the largest mature animals yet providing maximum adjustability from 2500 lbs down to 300 lbs cattle.

Standard Features
• Right-hand or left-hand control operation
• Dual side exits
• Choice of fully sheeted split tailgate or “Easy Action” vertical lift tailgate
• Dual neck access area for safe and easy vaccinations
• Double-side squeeze
• Dual side Drop-Down Side Bars
• Drop-down and detachable Sheeted Side Panels
• Double Bottom Floor adjusts from 8” - 29” (16 settings)
• HD850 Scale Brackets on every chute

Optional Features
• Choice of 3 headgates
• M-Series Chute Trailer
• Palpation A.I. Cage
• Scale accessories on page 10

Split Tailgate
Vertical Lift Tailgate
**Big Valley™ MX-V**

**Squeeze Chute**

- Superior value yet economically priced.
- Breakthrough design is tough enough and big enough to handle a wide variety of animals.
- Designed with the safety of the operator and the animal in mind.

**Standard Features**

- Left-hand control operation
- Single side exit
- “Easy Action” vertical lift tailgate
- Double-side squeeze
- Double-side Drop-Down Side Bars
- Drop-down Sheeted Side Panels
- Double-side Bottom Floor adjusts from 7” - 17” (9 settings) to accommodate a wide variety of animals
- 1000 lbs capacity
- **Includes CL-5 Self-Catch Headgate**

**Optional Features**

- MXV chute trailer
- Palpation A.I. Cage
- Scale accessories on page 10

---

**Big Valley™ Calf Table**

Updated design for years of use. Locking tilt and reversible head gate make for flexible operation. This table is a must for branding, castrating and vaccinating calves up to 450 lbs.

**Standard Features**

- Reversible headgate & tilt release
- Lower access panel
- Heavy duty drop bars and ratcheting latches
- Fully assembled from the factory ready to use
- 2 Dally cleats for rear leg tie off
- Headrest for reduced stress included

Chute Trailers & A.I. Cage

Chute Trailers

M-Series Chute Trailer
- Convenient, one-man loading and transporting of the M1-V and HMD chutes
- Chute can be raised and lowered with hand winch
- Allows easy positioning of chute to alleyway
- 2" Ball coupler
- Adjustable jack
- Includes rims, less tires

MXV Chute Trailer
- Provides convenient loading and transporting of the MX-V chute
- Hookup brackets (supplied) attach to pre-drilled holes on chute
- Uses 2" ball coupler
- Finished with our premium powder coated finish
- Includes rims, less tires

Big Valley™

A.I. Cage

- Provides a safe, convenient access area behind the chute
- Sheeted double doors self-lock to block alley and keep you safe
- Allows quick access to the opposite working area
- Attaches to the rear of any Big Valley® Squeeze Chute
- Includes adapters to attach to Big Valley® Adjustable Crowd Alley, allowing the Crowd Alley to be adjustable when attached to the A.I. Cage
- A.I. Cage Transport Bracket is used when the A.I. Cage is being transported while attached to a chute; it provides the necessary support to keep the A.I. Cage from twisting or bending the frame of the chute

**Big Valley™ Heavy Duty Headgates**

**A. M-Series Self-Catch Headgate**
- Adjustable from both sides for a more precise fit and increased safety
- Available with or without Nek-Stender® Bars
- Attaches to any Big Valley® chute, right- or left-hand operation
- Adjusts to handle livestock from 300 lbs. and up
- Recommended for M1 & M1-V chutes
- Pins allow for quick adjustment of width opening

**B. M-Series Manual Headgate**
- Features the “Pos-o-lock” ratchet system, ensuring that cattle are caught safely and can’t escape
- Opening handle attaches parallel to the chute, out of the operator’s way, offering plenty of leverage to reduce operator fatigue
- Design of the handle allows it to swing from behind the animal, encouraging forward movement
- Attaches to any Big Valley® chute, operates either right-handed or left-handed
- Available with or without Nek-Stender® bars
- Recommended for M1 & M1-V chutes

**Big Valley™ Standard Duty Headgates**

**D. CL-5 Utility Headgate**
- Perfect for small herds
- Either manual or self-catch operation
- Yoke width adjusts from 4½” to 8”
- Left-hand or right-hand operation
- Mounts to alleyway or any of our Big Valley™ chutes
- Recommended for alley headgate stand

Tru-Test Indicators

A. Ezi-Weigh 5
• Simple to use
• Largest weight display on the market
• High contrast display with LED backlight, making it viewable in all conditions
• Durable case to withstand the toughest environment
• Tru-Test’s Superdamp™ III for speed and accuracy
• Compatible with all Tru-Test load bars and load sensors
• Auto zero function, ensuring any accumulated dirt is not weighed
• Fine mode for smaller weights

B. ID3000
• Up to 10,000 individual animal records
• Fully EID capable
• Download/upload data quickly and easily via cable to your PC
• Flexible use with any Tru-Test loadbars and platforms
• Internal rechargeable battery
• Fully upgradable to XR3000

Tru-Test Loadbars

C. MP600 Loadbars
• Designed for use with a platform
• Can be easily transported from site to site
• For use on a firm, level surface
• Wt. cap. 4,400 lbs. - 23" long

D. HD850 Loadbars
• Designed for permanent installation under Big Valley® M1 & M1-V Squeeze Chutes
• Their unique footing absorbs side loading force, preventing damage to scale
• Wt. cap. 6,600 lbs. - 34" long

E. Ezi-Weigh 5 System
• Total weighing capacity of 4400 lbs.
• Perfect product for basic weighing platform applications
• Includes all necessary power options and accessories
• Includes Ezi-Weigh indicator and MP600 Loadbars

Big Valley™
Care Center
Portable Calving & Sick Pen

- Provides a portable and self-contained working area to assist with calving and calf acceptance (nursing) problems
- Ideal cattle work area for smaller operations
- One-man operation and complete portability make it an essential part of any cattle operation
- Accepts any Big Valley® Headgate
- The squeeze gate is split, to allow it to swing out of the way to correct nursing problems, graft calves to cows or perform caesareans
- It can be swung completely out of the way to form a 10' x 8' or 10' x 10' pen
- Comes standard with 8' or 10' panels but can be enlarged by using 12', 14' or 16' side panels; the 4' access door provides easy entrance
- The Split Squeeze Gate can be swung out of the way to convert the Portable Care Center into a pen for treating and containing sick animals

Unsheeted System Kit 3

180-degree Sweep with 20’ Straight Adjustable Crowd Alley. Includes Overhead Sweep Pen Brace and Drop Down No Back.

- Item No. 46079662 (Model No. USK3) Will make either of the two systems drawn.

Unsheeted System Kit 4

180-degree 3-Panel Sweep Pen.

- Item No. 46079532 (Model No. USK4) Will make either of the two systems drawn.
Unsheeted System Kit 5

120-degree 2-Panel Sweep Pen.

- **Item No. 46079542 (Model No. USK5)**
  Will make either of the two systems drawn.

Unsheeted System Kit 6

180-degree 3-Panel Sweep Pen with a 10’ Straight lead-in Panel.

- **Item No. 46079602 (Model No. USK6)**
  Will make either of the two systems drawn.

With our good, better, best approach, every Behlen gate and corral panel is designed to perform. Rugged, resilient and field proven, simply pick the level of performance you need for your site.

**Heavy Duty**
- Designed to withstand the most damaging conditions, the Heavy Duty collection features 3 finishes, heavy gauge steel tubing, special Z-braces, and saddle weld joints, so you can count on them to last.
- **Gates:**
  - Rugged 2” and 1-5/8” diameter tubes
  - Hefty 14 or 16 gauge steel
  - Powder Coat, Galvanized or Hot-Dipped Galvanized Finish
- **Corral Panels:**
  - Rugged 2” diameter tube
  - Hefty 16 & 18 gauge steel
  - Powder Coat, Galvanized or Hot-Dipped Galvanized Finish
  - Heavy Duty 2” diameter arch gates, entrance panels and inverted arches

**Medium Duty**
- **Gates:**
  - Rugged 1-5/8” diameter tube with wire mesh panels
  - Heavy 16 & 18 gauge steel
  - Resilient Powder Coated or Galvanized Finish
- **Corral Panels:**
  - Rugged 2” and 1-5/8” diameter tube
  - 16 & 18 gauge steel
  - Powder Coat or Galvanized Finish
  - Medium Duty 1-5/8” diameter entrance panels and arch gates

**Utility**
- For everyday performance that will last, and last, the Utility lineup is made for the job. Big on value, and low on maintenance, Utility works as hard as you do.
- **Gates:**
  - Utility 1-5/8” diameter tube
  - Utility 20 gauge steel
  - Resilient Powder Coated or Galvanized Finish
- **Corral Panels:**
  - Utility 1-5/8” diameter tube
  - Utility 18/20 gauge steel
  - Resilient Powder Coated or Galvanized Finish
Hot-Dipped Galvanized

Zinc is heavily bonded with steel to provide the most corrosion resistant finish.

This unique process starts with:
1. Automotive grade, high tensile steel
2. Followed by Behlen Country’s exclusive on-site hot-dip galvanizing process
   a. Increased life due to zinc coating on the inside as well as the outside of product
   b. Provides the ultimate protection against corrosion and insures a lasting finish
   c. For example: a 16” 2” gate has over 7 pounds of zinc applied over automotive grade, high tensile steel

GalvSmart

Behlen Country’s exclusive “double coat” finish creates a superior rust protection.

The GalvSmart process starts with:
1. Automotive grade, high tensile, pre-galvanized steel
2. Followed by a state-of-the-art wash system:
   1) Alkaline cleaner removes oils, soils, etc.
   2) Degreasing Rinse
   3) Rinse
   (This process ensures maximum adherence of top coat for a no blister, no peel tough finish)
   4) Phosphate preps material for adhesion
   5) Spot-free Rinse
   6) Reverse osmosis rinse
3. All welds are coated with silver powder coat to match galvanized finish
4. Behlen Country premium clear powder coat to finish the entire product
   a. Electrostatically applied, ensures no runs and even coverage
   b. 375° baked-on finish is hard as nails
   c. UV resistant (fade resistant)
   d. Similar to the process used in the automotive and appliance industry

Galvanized

Galvanized steel is an effective anti-corosion resistant finish, with layers of zinc permanently bonded to the steel.

1. Automotive grade, high tensile, pre-galvanized steel
   a. All welds are coated with zinc rich paint for increased protection

Premium Powder Coat

Behlen Country Premium Powder Coat provides a long lasting, weather resistant finish.

This unique process starts with:
1. Automotive grade, high tensile steel

Followed by a state-of-the-art wash system:
2. 6 stage wash and chemical etch
   1) Alkaline cleaner removes oils, soils, etc.
   2) Degreasing Rinse
   3) Rinse
   4) Phosphate preps material for adhesion
   5) Spot-free Rinse
   6) Reverse osmosis rinse
   (This process ensures maximum adherence of top coat for a no blister, no peel tough finish)

3. Behlen Country Premium Powder Coat
   a. Electrostatically applied, ensures no runs and even coverage
   b. 375° baked on finish is hard as nails
   c. UV resistant (fade resistant)
   d. Similar to the process used in the automotive and appliance industry

Premium Powder Coat with Zinc Primer

This unique process starts with:
1. Automotive grade, high tensile steel

Followed by a state-of-the-art wash system:
2. 6 stage wash and chemical etch
   1) Alkaline cleaner removes oils, soils, etc.
   2) Degreasing rinse
   3) Rinse
   4) Phosphate preps material for adhesion
   5) Spot-free rinse
   6) Reverse osmosis rinse
   (This process ensures maximum adherence of top coat for a no blister, no peel tough finish)

3. Zinc rich primer provides another layer of protection for increased life of finish
4. Behlen Country premium powder coat paint to finish the entire product
   a. Electrostatically applied, ensures no runs and even coverage
   b. 375° baked-on finish is hard as nails
   c. UV resistant (fade resistant)
   d. Similar to the process used in the automotive and appliance industry

GalvSmart

Behlen Country’s exclusive “double coat” finish creates a superior rust protection.

The GalvSmart process starts with:

Heavy Duty Gate

Best Value in a Heavy Duty Gate

- Designed for crowding livestock areas
- Heavy, all 16 gauge steel tubing
- Horizontal tubes are notched and welded for additional strength
- Vertical Z-braces offer extra strength and support
- 6 Rails, 50" High
- 3/4" x 12" long threaded bolt hooks for hinges
- Welded latch and 36" long plated chain
- 18 and 20 foot long gates come standard with 3 bolt hooks for added support
- Long-lasting, UV resistant powder coat finish

**NOTE:** ALL GATES ARE 4” LESS THAN LISTED LENGTH TO ALLOW FOR GATE HARDWARE AND PROPER CLEARANCE.
**15/8" • 20 Gauge Gate**

**GalvSmart Gate**

- Exclusive “double coat” Behlen finish creates a superior rust protection
- Provides the benefit of powder coating over galvanized tubing - the best of both worlds
- Square corners for increased animal safety
- Horizontal tubes are notched and welded for additional strength
- Vertical Z-braces offer extra strength and support
- 6 Rail, 50" High
- 5/8" x 6" screw hooks for hinges
- 18’ gate comes standard with 3 screw hooks
- Latch and 36" long plated chain

**A. Gate Brackets**
- Used to attach gates to walls
- Accommodates 2" gates

**B. Hanging Clip**
- Used for attaching a gate or corral panel to a post or a flat surface

**C. Horse Gate Latch**
- Allows gate to be opened from horseback
- Fits both 1 5/8" gates or 2" gates
- Adjustable height and reversible

**D. Double Piston Lever Latch**
- Allows easy opening of gate from horseback
- Includes safety lock
- U-Bolts included

---

**AVAILABLE COLORS:** GALVANIZED

**AVAILABLE IN THE EAST AND WEST REGIONS.**

Corral Panels

2" · 16 Gauge Panel
Crowding Corral Panel - 66" Tall

- Designed specifically for crowding situations
- Includes square corners and J-legs
- Behlen Country’s pin hookups:
  - Are easy to use
  - Reduce space between panels
  - Are usable on uneven ground
  - Allow 3 or 4 panels to be fastened together at a common point
- 1-5/8" one piece vertical brace is formed and welded for maximum strength and stability
- Our unique J-leg design has a small contact point with the ground to prevent unwanted panel movement
- 6 Rails (Entrance Panel is 4’ wide and has a 7’ Tall Arch)
- Recommended for use with Big Valley Cattle Management Systems
- Long-lasting UV resistant premium powder coat paint

Inverted Arches

- Available in two sizes 10’ and 12’
- Made of extra heavy, rectangular steel tubing:
  - Bottom tubing is made of 3/16” thick material
  - Uprights are made of 11 ga. material
- Optional Double Piston Gate Latch can be used with 2” gate
- Can be used with our 1-5/8”–16 gauge or 2” –16 gauge Crowding Corral Panels
- Pin hookups:
  - Are easy to use
  - Reduce space between panels
  - Are usable on uneven ground
  - Allow 3 or 4 way connections for pens
- Recommended for use with Big Valley Cattle Management Systems
- Long-lasting UV resistant powder coat paint

A. & B. Corral to Wall Panel Hook-up
• Allows corral panels to be attached to a flat wall

C. Galvanized Butterfly Clamps for 1-5/8" tubing
• Galvanized clamps add more stability and strength to corral panels with standard chain hookups

D. Painted Butterfly Clamps for 1-5/8" tubing
• Galvanized clamps add more stability and strength to corral panels with standard chain hookups

E. Galvanized Butterfly Clamps for 2" tubing
• Galvanized clamps add more stability and strength to corral panels with standard chain hookups

F. Painted Butterfly Clamps for 2" tubing
• Galvanized clamps add more stability and strength to corral panels with standard chain hookups

G. & H. Chain Hardware Package
• Used to fasten panels with chains
• Bolt and nut included

I. Corral Adaptor Rod
• Used as a drop pin for hooking uncommon pin hookup corral panels together
• Heavy 9/16" diameter rod will take rugged abuse

Round Tanks
Poly Stock Tanks

- Durable seamless design resists breakage.
- All round-end tanks have an extra heavy duty, molded rim and an extra-deep sidewall rib design for additional strength.
- Round tanks have a “formed open” rim.
- Heavy duty, molded-in aluminum drain fitting and 1 ¼” poly drain plug ensure a long-life. (PRE214 & PRE216 have no drain plugs because they are easy to tip.)
- FDA food-grade approved poly, tested to -20°F, corrosion-free, impact resistant and recyclable.
- Premium UV Protection assures long life and resistance to color fade in outdoor use.
- All poly tanks have a THREE-YEAR WARRANTY.

How They Work

Heavy foam insulation keeps water at the perfect temperature, regardless of conditions. Ground water enters the unit between the temperatures of 48°F and 56°F, where it remains until the waterer is opened by the animal. As the animal drinks, new water enters through the automatic valve and mixes with the water already in the waterer, so it is constantly replenished and prevented from freezing. The water in the waterer is kept in the dark, which prevents algae growth.

When the waterer is not in use, an optional Shut-Off Valve Kit prevents water from entering and drains the waterline to prevent freeze up.

Energy-Free Waterer float balls push down effortlessly, requiring half the pressure of competitors’ float balls, so even calves, sheep and other small animals can drink easily.

Energy-Free Waterers

- Built-in hold downs
- New, non-siphoning BL water valve, which features:
  - Fast, consistent fill
  - Units have a non-siphoning, easy maintenance water valve
  - Use with pressure lines from 0-55 p.s.i.
  - Additional pressure regulator required for pressures above 55 p.s.i.
- Removable drain plugs and accessible covers
- Fully assembled, ready to install
- 5-year limited warranty on the body and a 1-year limited warranty on valves and controls
- To ensure proper operation in cold weather, it is recommended that each unit be installed with the Poly Earth Tube (purchased separately)

A. & B Super 2 or 4-Hole Cattle Waterer
- Designed for heavy cattle use in extremely cold temperatures
- Tested at -20°F for 48 hours without freezing with no animals drinking
- Rim design helps keep float balls free of ice buildup
- Extra-thick 4” urethane insulation
- Removable top for hot weather operation
- Easy access for installation and maintenance

C. 4-Hole Cattle Waterer
D. 2-Hole Cattle Waterer

E. Shut-Off Valve Kit
- Hydrant style drain back feature protects waterer from freezing when not in use

- Telescoping steel handle
- All brass valve

**Electric & Insulated Waterers**

- One-piece, heavily insulated waterer, poly design is rust and corrosion free
- Thick styrofoam floor keeps the frost line below the waterer
- Urethane in the walls provides over four times the insulation of competitors' models (tested to -20° F)
- Low-wattage, infrared heat pad directly under the water trough (starts at approx. 42°F)
- Heat pads are totally isolated from the animal to prevent danger from shock
- Double-insulated design eliminates the possibility of stray voltage
- Units have a non-siphoning, easy maintenance water valve
- Additional pressure regulator required for pressures above 55 p.s.i.
- An optional low-pressure valve is available for special applications
- Built-in hold downs
- Removable drain plugs
- Easy access doors
- Fully assembled, ready to install

**A. Extreme Weather Poly Waterer**

- Infrared heat - no electric items in the water
- Powerful 220-watt heater heats the basin and supply line
- Large, 8 gallon capacity
- 5 year warranty on the body
- Assembled for the customer
- Large access panel
- Molded-in hold downs
- Latched float cover for easy maintenance
- Extra thick insulation keeps the cold out and reduces energy costs

**HAYSMART Bale Feeder by Big Valley®**

**Benefits of the unique chain cone design:**
- Increases hay utilization to more than 96% compared to 85% with other feeding methods
- Allows cattle to move the hay around, eating evenly through the toughest bale
- Suspends the hay off the ground at an ideal height

**Superior strength and durability:**
- 6’ tall
- 18 tight feeding spaces
- 16 gauge heavy duty sheeting
- Grade 5 plated hardware
- ¼” Grade 40 High Test chain
- Finished with green powder coat paint

**Customer Gene Kinslow writes:**
It is undoubtedly the best designed, heaviest round bale feeder we have ever had on the farm. Additionally, the 624 lb. weight of feeder does not allow the cattle to move the feeder. Absolutely no hay slips out from underneath the HAYSMART feeder to be trampled like happens with a typical lightweight, traditional round bale feeder. This feeder is actually making us money. The HAYSMART bale feeder has saved Gene and many other customers a minimum of 20% of the hay fed.

A. BF8
- A durable feeder at a great price
- 1-5/8" dia., 16 ga. galvanized round steel tubing provides corrosion resistance and long life

B. HDF8
- Economical “S-Bar” bale feeder helps keep calves out of feeder and saves hay
- The strong 1-5/8" dia. (16 ga.) galvanized steel tubing ensures long life

C. HDF8M
- S-Bar design and strong 1-5/8" (16 ga.) galvanized steel tubing for long life
- Strong 4-gauge mesh panel in place of solid panel holds hay in and circulates air to reduce moisture buildup, thereby reducing spoilage

D. Econo Bale Feeder
- 1-5/8" dia., 16 ga. horizontal steel tubing
- 1½" dia. steel tubing slant bars
- Finished with our premium powder coat paint

E. Super Duty Bale Feeder
- 1-5/8" dia., 16 ga. “S-Bar” dividers keep calves out and save hay
- The horizontal tubing is heavy 2" 14 ga. steel
- Easy to assemble using rolled and punched tubing and punched, flat bottom connection
- Features 15 eating spaces
- Finished with our premium powder coat paint

F. 2-Piece Heavy Duty Bale Feeder
- 1-5/8" dia., 16 ga. round steel tubing slant bars
- 1x2 14 ga. oval horizontals add superior strength and durability
- Behlen Country is the only manufacturer featuring a 12 ga. angle connection for ultimate strength
- Available in green or red premium powder coat paint

G. Flex Feeder
- Easy setup and portability with the quick pin hookups
- Expands to make any size bale able to be fed
- Multiple configurations available by adding additional single piece sections
- Comes in 4 sections

A. V Bar Hay Feeder
- Increased longevity of feeder with the unique V Bar design
- Maximize feeding with bales sized up to 4’x8’
- Cattle consume hay more consistently with V Bars centering the bale
- 16 ga. heavy-duty sheeting
- Rugged 14 & 16 ga. tubing
- 56½” Tall
- Finished with our premium powder coat paint

B. Century Feeder
- Long life due to the polyethylene pipe design
- Durable polyethylene material is impact resistant, rust-free and UV resistant
- Safe with no sharp edges
- Century feeder carries a 5 Year Warranty
- Must be ordered in quantities of 10

C. Hay Feeder Panels
- Great for feeding hay in-line or from a stack
- Can be connected together or used alone
- Designed to withstand abuse from the toughest animals
- “S-Bar” design saves hay and helps keep calves out of feeders
- Made from heavy 14 ga., 2” dia. steel tubing
- Painted with premium powder coat finish to ensure long life against sun fade, corrosion and weathering
D. Calf Pass Panel
- Versatile way to keep larger animals out of smaller animal feed areas
- Manufactured with 2" (16 ga.) heavy-gauge steel
- Versatile chain connectors allow lockup to any post or panel
- The galvanized height adjustment bar is adjustable to any height
- Provides 8 spaces with a width of 15" per space and a maximum height of 46½"
- Panels are finished with our premium powder coat paint

E. Calf Creep Feeders
- Keeps cows out and allows calves to eat
- Simplified lid design opens easily
- Molded-in side deflectors provide protection from rainwater
- One-piece polyethylene feed hopper will not corrode or rust
- Tall side height keeps larger animals from reaching into feed area
- Molded trough brace promotes animal safety in eating area
- Runners for hopper face side-to-side to allow feeder to be moved easily
- Easy to assemble - long drop rods for quick assembly
- All metal parts are galvanized for long life and durability
- UV stabilizers help prevent sun damage

A. Galvanized Feed Bunk
- Strong, yet portable
- Heavy duty galvanized steel construction
- One-piece molded poly trough
- Smooth, rounded corners
- Square ends that allow bunks to be bolted together

B. Painted Feed Bunk
- Strong, yet portable
- Heavy duty construction
- One-piece molded poly trough
- Smooth, rounded corners
- Square ends that allow bunks to be bolted together
- More capacity than the competition

C. Poly Feed Bunk
- Roto-molded of extra thick, FDA-approved, food-grade polyethylene that is easy to clean and corrosion-free
- Ribbed, double-wall construction
- Smooth, rounded design helps prevent injury
- Deep, rounded feed troughs and drain openings prevent spoiled feed
- Pluggable drain openings allow use as a water tank
- Tested to -20° F
- So tough they come with a two-year warranty against livestock damage
- Available in 5' and 10' lengths

D. Standard 11' Feed Bunk
- Heavy duty, 16 ga. tubular frame
- Tough one-piece poly feed trough eliminates corrosion
- Smooth, all-welded design helps prevent injuries
- Five sturdy 2" straps support the feed trough
- Square ends that allow bunks to be bolted together
- Finished with our premium powder coat paint
- Available in red or green

A. Super Bull Mineral Feeder
- Heaviest and largest 3 compartment ground feeder available
- Large 40” diameter base and 17” tall
- 4.6 cu. ft. capacity easily holds up to 250 lbs. of salt or mineral (block or loose)
- Lynch pin retainer for fast flap removal and easy filling
- Large base with 3 anchor points eliminates tipping
- High quality UV protected polyethylene resists breakage, even at -20° F.

B. & C. Heavy Duty Poly Bull Feeders
- Tough enough for bulls, easy enough for small animals
- Self-closing rubber cover keeps out rain, snow and dirt
- Poly and rubber materials are corrosion-proof and will withstand cold temperatures
- Three or four compartments to hold mineral

D. Wind Vane Feeder
- Tough, functional and economical
- All-poly rotating head protects mineral
- 1.9 cu. ft. poly tub, large 48” dia. base ring is solid ¾” steel for extra long life

E. Poly Wind Vane Feeder
- One-piece poly-hood, trough and vane assembly is rust-and corrosion-proof
- A grease zerk to an internal bearing ensures easy turning in the wind
- Base and long legs are heavy-gauge steel tubing for long life
- Holds two mineral blocks
- Heavy duty for the roughest abuse
